How much water is stored in the upper 5 m at this montane catchment site, and how did it change between the spring and late-summer surveys?

Start from your discipline

Geomorphology
Where is fresh rock?

Hydrology
How much water is stored?

Forest ecology
How much water can roots reach?

Biogeochemistry
How thick is the reactive zone?

Natural hazards
Is the regolith continuous?

Methods in the catalog

Electrical resistivity | Seismic refraction | Ground-penetrating radar | Electromagnetics | Borehole

Design preview. Values are illustrative and no computation is performed.
